

If you want a lower cell phone bill then you are going to have to start by taking the time to look at your cell phone bill, and you will need to understand your cell phone bill. We have provided some key **ways to lower cell bills** for you.

A **lower cell bill** is always a good thing. There are certain **cell phone billing charges** that everyone should be watching in order to get a lower cell phone bill. We have created a list of key areas that unmonitored can lead to blowing your chance of having a lower cell phone bill.

Don't Use So Much Cell Phone Service:

Okay, here is an easy one. Don't overuse your cell phone service. How many of us have made a call using a cell phone when we were standing right next to a land line phone. That is lazy. Don't use the cell phone unless you need to. This will definitely bring you closer to **reducing cell phone cost**

Cell Phone Roaming Charges:

No one should ever have roaming charges in this day and age. If you find yourself with roaming charges, you should speak with your Carrier.
SMS Text Messaging Overage Charges:

Get on the right plan.

If you are going to text a lot, then get an unlimited plan. Watch your kids when it comes to texting. You should always start your child who is getting a phone for the first time on an

unlimited text messaging plan.

Cell Phone Discounts:

If you are supposed to be getting a certain discount based on being the employee of a larger firm that has special employee rates in place, then make sure you are getting that discount. Cell phone employee discounts fall of cell phone bills all the time. Get your proper cell phone discount.

Lower cell phone bills are very achievable. You just have to do a little work to make it happen. CellBills.com is the **fastest way to lower cell phone bills**. Check us out if you would like **lower wireless phone bills**
